## **NATURE'S WAY INTERIOR PLANTSCAPE, INC. BECOMES 21st BUSINESS TO ATTAIN "GREEN" CERTIFICATION**

**The Woodlands, Texas, (April 29, 2010)**—The Green Earth—Green Plants® program announced today that Nature's Way Interior Plantscape, Inc., an interior plantscape business in Houston, Texas has become the 21st business to become a Green Earth—Green Plants® certified business. "Nature's Way Interior Plantscape, Inc. has proven that they are an environmentally-responsible business and operate in an ecologically-friendly manner, says Kathy Fediw, LEED AP, CLP, CLT, president of Johnson Fediw Associates and founder of the certification program. Nature's Way Interior Plantscape, Inc. is a fairly new company designed from the very beginning to be eco-friendly. They take care of indoor plants in the greater Houston area for office buildings, hotels and public spaces. "We know that plants help improve indoor air quality, and caring for them in an environmentally-safe manner is crucially important" says Fediw.

Daniel VanDeusen, owner and manager of Nature's Way Interior Plantscape, Inc. passed a rigorous 17 page assessment and provided documentation for each credit claimed. The assessment rates a business on their indoor and outdoor facilities, vehicle usage, recycling program, horticultural practices, staff education and giving back to the community.

"Nature's Way Interior Plantscape, Inc. has committed to being a chemical-free business, using natural methods to control pests and care for their clients' plants. Their website features a client center where customers can view their plant inventory, account balance and invoices."

"We are proud to recognize their achievements and their commitment to "going green" and know they will set an example to other businesses in the Houston area to operate in a more earth-friendly manner," says Fediw.

Johnson Fediw Associates is a third-party consulting firm providing green certification programs to horticulture businesses.
